

U.D.S.

UTILITY DESIGN SOLUTIONS

Innovation in DESIGN for Safety

Introduction

Utility Design Solutions have extensive experience of designing water mains refurbishment projects from detailed refurbishment design of distribution networks to large diameter trunk water main projects

At U.D.S. we are committed to providing quality safety conscious and environmentally aware projects while driving down the cost of production.

Health & Safety

At Utility Design Solutions the Health, Safety and Well being of anyone involved with a scheme is of the utmost priority. With a sound background in health & safety we are experienced in the requirements within design to provide a safe working environment to anyone affected by our operations. At U.D.S we are constantly improving on Designers Risk Assessments & method statements, looking for best practise and the safety of operatives and the public.

Environmental

U.D.S have built up good working relationships with a range of contacts throughout England and Wales, these include the Environment Agency, Countryside Council for Wales, Natural England, English Heritage, Archaeological Trusts, CADW. and many other agencies and organisations.

**Commitment
To our future
Environment**

Highways

We understand the cost and disruption involved when utility work affects the public highways. Utility Design Solutions are experienced in liaison with the Local Authority's throughout England & Wales. We Liaise with Highways, Bridges engineers and Road Closure applications, and are conversant with T.M.A. Regulations.

Quality in our future

Quality assurance procedures are in place ensuring that projects are to the highest standard. Use of the latest Information technology and communications. allowing for a carbon efficient, environmental protective company.
